Flathead River

(over)

U. S. BOARD ON GEOG. NAMES

"The stream referred to is really the main Flathead, as it is considerably larger than either of the two others, locally known as the "Middle" and "South" forks. In local usage "Flathead", without qualifying adjectives, is used almost exclusively with reference to the river below mouth of South Fork and down to Flathead Lake". R. H. Goshorn, Kalispell, Mont.
