

Mokuaweoweo

Adopted name _____
 Thing named _____
 Names _____
 crater on the summit of Mauna Loa, Hawaii; elevation, about 13,500 feet; second largest active crater in the world; area, 3.70 square miles; circumference, 9.47 miles; length, 3.7 miles; width, 1.74 miles; intermittently active, the activity usually lasting only a few days, when the lava forces its way through the side of the mountain, in a lava flow, after which the eruption in the crater ceases.

Mokuaweoweo,

U. S. Geol. Survey, Water Supply Paper No. 318, p. 526.
